EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Burton Amernick (Reg. No. 24,852) on 1 July 2010.

The application has been amended as follows:

Claim 14 (currently amended) A process for coating
internals which have previously been introduced into a reactor,
except for the coating of electrically heatable, at least partly
open-cell foams, with a catalytically active solid material or a
precursor thereof, in which an aerosol which contains the
catalytically active material or the precursor thereof as a
disperse phase is provided and the aerosol is passed through the
reactor at a rate in the range of from 0.1 to 4 m/s, which is
established so that the disperse phase of the aerosol is
deposited on the internals in the reactor and wherein the
reactor is employed for carrying out oxidation or
dehydrogenation reactions and the oxidation or dehydrogenation
reactions are the synthesis of maleic anhydride, phthalic
anhydride, acrolein, (meth)acrylic acid, or ethylene oxide.

Claim 37 (currently amended) A process for coating
internals which have previously been introduced into a reactor,
except for the coating of electrically heatable, at least partly
open-cell foams, with a catalytically active material or a
precursor thereof, in which an aerosol which contains the
catalytically active material or the precursor thereof as a
disperse phase is provided and the aerosol is passed through the
reactor at a rate in the range from 0.1 to 4 m/s, which is
established so that the disperse phase of the aerosol is
deposited on the internals in the reactor and wherein the
reactor is employed for carrying out oxidation or
dehydrogenation reactions and the oxidation or dehydrogenation
reactions are the synthesis of maleic anhydride, phthalic
anhydride, or ethylene oxide.

2. Claims 14-25, 27-33, 36, and 37, are allowed.
3. The following is an examiner's statement of reasons for allowance: The closest
prior art has been made of record. This prior art neither teaches nor suggests a process
for coating internals which have previously been introduced into a reactor by flowing an
aerosol through the reactor (i.e., *in situ* coating).

Any comments considered necessary by applicant must be submitted no later
than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Fletcher III whose telephone number is (571) 272-1419. The examiner can normally be reached on Sunday, 5:00 AM - 12:00 PM and Monday through Friday, 5:00 AM - 3:30 PM.
